Know the unknown secrets of SQL Server

# SQL Server Secret Diary

To Buy this book, please visit <http://ranksheet.com/Books/sql/>

## Contents

1. How to secure source code of stored procedure, UDF and view? .....	9
2. How to use GO statement in SQL Server?.....	10
3. How to repeat the statements without using loops?.....	14
4. How to check the queries are ANSI compatible?.....	17
5. How to use ORDER BY clause in view? .....	18
6. How to use COUNT() function if the total records are larger than INT data type? .....	20
7. DELETE versus TRUNCATE? .....	20
8. What is the recommended way to get the list of database objects? .....	20
9. SET Versus SELECT? .....	22
10. How to do case sensitive search in SQL Server? .....	25
11. How to select wildcard characters _ or % using LIKE? .....	26
12. How to pause and execute the query?.....	28
13. How to solve server time out problem?.....	29
14. How to control the order of execution of triggers? .....	32
15. EXECUTE versus sp_executesql?.....	32
16. How to find space consumption of database or table?.....	34
17. What is the fastest way to find number of rows in a table?.....	35
18. How to use TOP n PERCENT, TOP n and TOP WITH TIES clause?.....	38
19. How to get the remote computer name from SQL Server?.....	41
20. Why not use BINARY_CHECKSUM() for case sensitive searches? .....	42
21. How to use INSERT <<Table Name>> DEFAULT VALUES?.....	43

# SQL Server Secret Diary

To Buy this book, please visit <http://ranksheet.com/Books/sql/>

22. How to get the latest identity value of table in different ways? .....	44
23. How to create index in the recommended order? .....	46
24. What is the difference between unique and unique index?.....	47
25. How to make entire database as read only?.....	48
26. How to enter null values explicitly from SQL Server Management Studio? .....	50
27. How to get date time instead of using Getdate()?.....	50
28. How to rename the database and table? .....	50
29. How to use UNION and UNION ALL?.....	52
30. How to disable auto commit mode?.....	52
31. How to improve the data import performance in the table with constraint?.....	53
32. How to improve the performance of replication?.....	54
33. How to improve the performance of stored procedure?.....	54
34. SELECT versus RETURN?.....	55
35. How to get current database user name? .....	55
36. How to use CURRENT_USER? .....	55
37. CROSS JOIN versus INNER JOIN?.....	55
38. How to improve the performance of JOINS?.....	56
39. How to improve the performance of CURSOR? .....	57
40. How to handle transaction better?.....	57
41. How to do validation using views?.....	58
42. Known and Unknown things about trigger? .....	63
43. How to use BULK INSERT?.....	64
44. How to test the performance of a particular query constantly?.....	65

# SQL Server Secret Diary

45. Compiling SQL statements?.....	66
46. How to use COALESCE function? .....	66
47. Known and unknown things about TIMESTAMP datatype? .....	68
48. How to use SOME and ALL operators?.....	69
49. REPLACE versus STUFF? .....	71
50. NEWID versus NEWSEQUENTIALID? .....	72
51. How to add IDENTITY column to an existing table?.....	74
52. How to make an existing column as IDENTITY?.....	74
53. How to find which table contains more records in the database?.....	75
54. How to find locks?.....	77
55. Ascending Index versus descending index? .....	77
56. How to use single user, multi user and restricted use mode?.....	78
57. Why SQL Server does not allow more than one null values for the UNIQUE column?.....	80
58. Known and unknown things about UDFs? .....	82
59. SIGN verses ABS? .....	82
60. How to use xp_cmdshell? .....	84
61. Known and unknown things about multi language data? .....	87
62. How to choose right data type?.....	87
63. EXCEPT Vs. NOT IN .....	89
64. INTERSECT Vs. INNER JOIN .....	91
65. How to improve the performance of reports?.....	92
66. How to avoid dead locks? .....	92
67. How to use OUTPUT clause?.....	93

68. How to apply OOPS in SQL Server? .....	94
69. What is SQL injection attack? .....	95
70. How to prevent from SQL injection attack? .....	96
71. How SQL Server 2005 behaves when the row size exceeds 8060? .....	103
72. How to get the list of databases the user have access? .....	103
73. How to create data script? .....	106
74. How to recompile database objects? .....	111
75. How to implement database server-side paging? .....	112
76. How to convert result-set to comma-separated string without loop? .....	114
77. How to convert comma-separated string to result-set without loop? .....	115
